CLI

onboard

Interactive onboarding wizard (local or remote Gateway setup).

Related:

Wizard guide: [Onboarding](#)

Examples

```
openclaw onboard
openclaw onboard --flow quickstart
openclaw onboard --flow manual
openclaw onboard --mode remote --remote-url ws://gateway-host:18789
```

Flow notes:

`quickstart` : minimal prompts, auto-generates a gateway token.

`manual` : full prompts for port/bind/auth (alias of `advanced`).

Fastest first chat: `openclaw dashboard` (Control UI, no channel setup).
